Quality management statement

Callaghan Fencing & Gates is committed to achieving customer satisfaction by providing quality products and services to the agreed requirement and in accordance with our quotation

We have 34 years experience in the supply and installation of security fencing, gates and barriers, and have built our reputation based on providing a quality, professional and trustworthy service from start to finish, and this is reflected in the many genuine reviews on our website and Google

A great deal of care is taken when sourcing materials, ensuring that the products are robust, durable, fit for purpose and competitively priced, we only use reputable UK suppliers and constantly communicate with them to discuss ways of improving efficiency and quality.

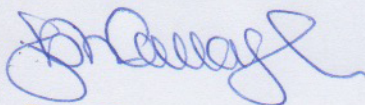

Our installation team is highly experienced having worked in many sectors of the construction industry including MCG sites, the MOD, schools, prisons, airports, animal welfare centres, and business / commercial premises.

All members of the team have the relevant CSCS / SSSTS / CPCS / CITB training, and are always involved in job briefings, toolbox talks and the reviewing of RAMS

We work hard to produce a high standard of workmanship, but occasionally things do go wrong, we will always try to rectify any problems to the best of our ability be it with the product or with our workmanship

This Quality management statement will be reviewed annually
